1. The Problem We're Solving

Travel is broken — not logistically, but experientially.

Decades ago:

- Going to a new city was a *once-in-a-lifetime* experience
- You hadn't seen what that city looked like — no reels, no vlogs, no Instagram
- A sunrise on a mountaintop was genuinely breathtaking because you'd never witnessed it before
- The excitement came from the *unknown*

Today:

- We've seen every city through 10,000 travel reels before we arrive
- The "wow factor" is gone — we walk up to Taj Mahal already knowing every angle
- Travel has become a checklist: *visit tourist spot* → *take photo* → *post* → *next*
- Groups of friends follow YouTuber recommendations blindly, pretending it's enjoyable
- People *don't know how to enjoy* anymore — they've forgotten what genuine exploration feels like
- The magic of serendipity — stumbling into an incredible hidden café, meeting strangers who become lifelong friends, getting lost in alleys and finding the best food — is dead

The Strava Analogy

Strava didn't make running *faster*. It made running *feel like a game*. Suddenly, running your regular route meant you were *conquering your city*. Leaderboards, segments, badges, and social proof turned a solitary grind into a shared adventure.

Velosta Community does for travel what Strava did for running.

We turn every trip into a living, breathing adventure game — with quests to complete, achievements to unlock, strangers to meet, stories to collect, and a permanent record of your journey that makes you feel like the protagonist of your own movie.

2. The Velosta Ecosystem — Three Pillars

How They Feed Each Other

From → To	Data Flow
Planner → Community	When a user generates & completes a trip, it seeds their community profile, unlocks quests for that destination
Community → Planner	Completed quests, vlogs, reviews, and ratings from the community become <i>real experience data</i> that the AI uses for future itineraries

From → To	Data Flow
Data Engine → Community	The scraped corpus (hidden gems, local tips, vendor intel) powers the quest content — "Find this secret café that only 3 Reddit posts mentioned"
Community → Data Engine	User-submitted content (verified vlogs, reviews, photos) becomes the <i>highest-confidence</i> data in the corpus

3. Community Pillar — The Big Idea

One-Line Pitch

A gamified travel social network where every trip is a quest, every experience is an achievement, and every traveler has a story worth telling.

The Experience in 60 Seconds

1. You open Velosta, plan a 5-day trip to Goa with your friends using the AI planner
2. The moment you land, your phone lights up: **"Welcome to Goa! 🌴 Your adventure begins."**
3. You see a quest board: **"The Goa Conqueror"** — 12 tasks across 5 days
4. Task 1: *"Find the fisherman's café that serves the best prawn curry in Palolem — no Google Maps, ask a local and prove it with a photo"*
5. You and your friends wander, ask around, find a tiny shack — the prawns are insane
6. You snap a photo, upload it →  **Quest Complete! +150 XP, "Local Explorer" badge progress**
7. Task 5: *"Watch the sunset from the secret cliff north of Anjuna — the one the vlogs don't show"*
8. You hike there, catch the sunset, record a 30-second vlog →  **+200 XP, "Golden Hour Hunter" badge**
9. Day 3: A notification: *"A group of solo travelers is meeting at Chapora Fort tonight for a bonfire. 4 spots left."*
10. You join. You meet people from 3 countries. The night becomes the highlight of your trip.
11. Day 5: You complete 9/12 quests → **"Goa Explorer — Silver Tier"** unlocked
12. Back home: Velosta compiles your photos, vlogs, quest completions, and route into a **cinematic trip recap** — a shareable story, a photobook-ready album, and a permanent chapter in your traveler profile

4. Core Concept: Quests & Gamification

Philosophy

Quests are NOT scavenger hunts or tourist checklists. They are **carefully crafted experiences** that, by completing them, the traveler *genuinely experiences the soul of the city*. The quest design should feel like being given a secret guide by a local friend who's lived there for 20 years.

Quest Design Principles

Principle	Description	Example
Serendipity First	Quests should create "accidents" that lead to genuine discovery	"Take the third left after the fish market and eat whatever the first stall serves you"
Anti-Tourist	Push travelers away from the Instagram spots toward the real city	"Skip the Basilica queue. Walk 200m east to the chapel with no sign — the frescoes are better"
Social Catalyst	Many quests require human interaction — talking to locals, joining groups	"Learn one sentence in Konkani from a local fisher. Record yourself saying it."
Sensory	Engage all senses, not just sight	"Find the bakery that makes pão at 5AM. The smell will guide you."
Time-Aware	Some quests only work at specific times — golden hour, dawn, market hours	"Be at Divar Island jetty at 6:15 AM. The mist rising off the Mandovi is a 10-minute window."
Progressive	Later quests build on earlier ones — meet someone in Q2, invite them to Q7	Chain quests that create a narrative arc across the trip
Effortless	Quests shouldn't feel like homework — they should feel like	The <i>doing</i> should be the fun part, not the reporting

Principle	Description	Example
	a movie heist	

Quest Categories

QUEST CATEGORIES		
	TASTE	– Food & drink discoveries
	GOLDEN HOUR	– Sunrise/sunset/light moments
	ADVENTURE	– Physical challenges, off-trail
	CONNECT	– Human interactions, local bonds
	CAPTURE	– Photography/videography missions
	HIDDEN	– Secret spots, off-map treasures
	CULTURE	– Rituals, arts, heritage deep-dive
	AFTER DARK	– Nightlife, bonfires, stargazing
	STILLNESS	– Meditation, nature, slow moments
	WILDCARD	– Unpredictable, random, chaotic

Quest Structure (Data Model)

```
interface Quest {
  id: string; // unique quest identifier
  cityId: string; // which city/destination

  // Content
  title: string; // "The Fisherman's Feast"
  description: string; // narrative description, reads like a story
  hint: string; // optional cryptic clue
  category: QuestCategory;
  difficulty: 'easy' | 'medium' | 'hard' | 'legendary';

  // Requirements
  timeWindow?: { // when this quest is available
    startHour: number;
    endHour: number;
    seasons?: string[]; // "monsoon", "winter", etc.
  };
  prerequisites?: string[]; // quest IDs that must be completed first
  groupSize?: {
    min: number;
    max: number;
  };

  // Verification
  verificationType: 'photo' | 'video' | 'checkin' | 'vlog' | 'peer' | 'auto';
  verificationPrompt: string; // "Upload a photo of the dish with the stall in

  // Rewards
  xpReward: number;
  badgeProgress?: { // contributes to which badge
    badgeId: string;
    progress: number;
  };
  unlocks?: string[]; // what this quest unlocks (events, quests, etc.)

  // Metadata
  estimatedDuration: number; // minutes
  physicalIntensity: 'chill' | 'moderate' | 'intense';
  bestFor: TripType[];

  // Data provenance – where did this quest content come from
```

```
sourceData: {  
  dataEngineRecords: string[];           // record IDs from the scraping engine  
  confidenceScore: number;               // how well-verified is the underlying info  
  lastVerified: Date;  
};  
  
// Community stats  
completionCount: number;  
averageRating: number;  
topSubmissions: Submission[];           // best vlogs/photos from completers  
}
```

5. Identity & Trust Layer

Why Identity Matters

This isn't Instagram. This is a community where you might meet strangers at a bonfire, share a jeep to a remote waterfall, or join someone's midnight trek. **Safety is non-negotiable.**

Verification Tiers

TRUST TIERS
TIER 1 – BASIC (can browse, view quests) — Email verified — Phone number verified
TIER 2 – VERIFIED (can complete quests, earn rewards) — Government ID uploaded (Aadhaar/Passport/DL) — Selfie verification (liveness check) — ID is encrypted, never displayed to other users
TIER 3 – TRUSTED (can host meetups, create events) — Tier 2 + 5 completed trips with quest activity — Community rating ≥ 4.2/5 from 10+ interactions — No safety violations
TIER 4 – AMBASSADOR (can curate quests, moderate) — Tier 3 + 20 completed trips — 50+ quests completed across 5+ cities — Created 3+ events with positive feedback — Invited by existing ambassador or Velosta team

Safety Mechanisms

Mechanism	Implementation
ID Verification	Government ID upload with AI-powered document verification (DigiLocker API for India)
Liveness Check	Selfie match against ID photo using face recognition
Emergency SOS	In-app panic button → alerts Velosta team + shares live location with emergency contacts
Event Check-in	QR-based check-in at meetups; attendee list visible to organizer
Report System	1-tap report with categories (harassment, no-show, unsafe behavior)

Mechanism	Implementation
Background Cooldown	New accounts can't host events for 30 days + must complete 5 quests first
Peer Rating	After every meetup/group interaction, mutual ratings (private, anonymous)
Blocklist	Users can block others; blocked users can't see your meetups or profile

6. Quest System — Deep Design

Quest Board UI

When a user lands in a city (detected via geofence or manual check-in), their quest board activates:

GOA QUEST BOARD

"The Goa Conqueror" – 12 quests across your 5-day trip

Progress:  4/12 complete

XP Earned: 650 / 2,400

TASTE

The Fisherman's Feast +150 XP

"Find the prawn curry shack in Palolem..."

The Spice Trail +200 XP

"Three spices. Three stalls. One story."

Feni & Fire (requires: Connect Quest #1)

Locked – complete a Connect quest first

GOLDEN HOUR

The Cliff Nobody Films +200 XP

The Mandovi Mist +300 XP

 Available: 5:45 AM – 6:30 AM only

[\[View All Categories\]](#)

[\[Today's Recommended\]](#)

Quest Generation Pipeline

Quests are NOT manually written. They are **AI-generated from the data scraping engine's corpus**, then human-reviewed by Ambassadors:

AI Quest Generation Prompt Template:

You are a quest designer for Velosta, a gamified travel app. Given the following verified data about {city}, create a quest that:

1. Leads the traveler to a genuine, memorable experience
2. Reads like a narrative – not an instruction manual
3. Requires real exploration, not just showing up
4. Can be verified with a photo, video, or check-in
5. Has the emotional quality of a scene from a movie

Data:

{data_engine_records}

Output a quest with: title, description (narrative), hint (cryptic clue), category, difficulty, time_window (if applicable), verification_type, verification_prompt, xp_reward, estimated_duration, and best_for trip types.

Dynamic Quest Adaptation

- **Weather-Aware:** If it's raining, swap "Golden Hour" quests for "Monsoon Magic" variants
- **Crowd-Aware:** If a spot is trending (many check-ins), surface alternative quests
- **Time-Aware:** Evening quests unlock as the day progresses
- **Group-Aware:** Solo travelers get different quests than friend groups
- **Progress-Aware:** If a user has completed 3 food quests, nudge toward adventure/culture

7. Rewards & Achievement Engine

XP System

Action	XP Reward
Complete an easy quest	100–150 XP
Complete a medium quest	200–300 XP
Complete a hard quest	400–600 XP
Complete a legendary quest	800–1,500 XP
Submit a vlog (approved)	200 XP
Host a meetup (5+ attendees)	500 XP
Get upvoted on a submission	10 XP per vote
Complete a full city quest chain	2x bonus on total
First to complete a new quest	"Pioneer" bonus +50%

Level System

Level 1	– Wanderer	(0 XP)
Level 5	– Explorer	(2,000 XP)
Level 10	– Adventurer	(8,000 XP)
Level 15	– Pathfinder	(20,000 XP)
Level 20	– Trailblazer	(40,000 XP)
Level 25	– Legend	(75,000 XP)
Level 30	– Velosta Elite	(120,000 XP)

Badge System

Badges are NOT participation trophies. They represent **real accomplishment** and are displayed prominently on profiles.

BADGE GALLERY

	Golden Hour Hunter	– 10 sunrise/sunset quests complete
	The Palate	– 20 food quests across 5+ cities
	Summit Seeker	– 5 mountain/trek legendary quests
	The Connector	– Attended 10 meetups, rating 4.5+
	Off the Map	– 15 hidden gem quests
	Continental	– Quests in 3+ countries
	City Conqueror: {City}	– Complete 80%+ of a city's quests
	The Director	– 10 approved vlogs, avg 4+ rating
	Night Owl	– 10 after-dark quests
	First Mover	– 5 "Pioneer" quest completions
	Velosta OG	– Top 100 all-time by XP

 SECRET BADGES (hidden until earned – creates surprise)
└ Criteria only revealed after unlocking

Tangible Rewards

XP and badges are intrinsic motivators. But Velosta also offers **real-world rewards**:

Reward	Requirement	Description
Exclusive Event Invites	City Conqueror badge	Invited to Velosta-hosted parties/experiences in that city
Velosta Merch Drops	Level 15+	Limited-edition travel gear (custom luggage tags, journals, etc.)
Early Access	Level 20+	Beta access to new cities, features, quest chains
Ambassador Program	Level 25+	Get paid to curate quests, host events, represent Velosta
Partner Perks	Any verified user	Discounts at Velosta-partnered vendors (from the data engine)
Trip Sponsorships	Velosta Elite	Fully/partially sponsored trips to create content for Velosta

8. Social Layer — The Travel Social Network

What This is NOT

- ❌ Not Instagram (no vanity metrics, no follower counts, no feed algorithm manipulation)
- ❌ Not Facebook Groups (no spam, no noise, no "where to eat in Goa???" posts)
- ❌ Not TripAdvisor (no review-bombing, no fake reviews, no anonymity)

What This IS

- ✅ A **verified community** where every user has proven their identity
- ✅ A **quest-first feed** — content is organized by quests, not chronology
- ✅ A **quality-over-quantity** platform — fewer posts, but every post is a real experience
- ✅ A **trust network** — you can see who's verified, their quest history, their ratings

Feed Design

The feed is NOT an infinite scroll of posts. It's organized by **active trips, quests, and meetups**:

 HAPPENING NOW IN GOA

 Quest Completion

@rahul_travels completed "The Fisherman's Feast"

 [Photo of prawn curry + fishing boats]

"Asked 3 locals. All pointed to the same shack behind the church. No sign. Best prawns ever."

 24  5  Share quest

 Meetup – Open Invite

Tonight @ 8PM – Chapora Fort Bonfire

Hosted by @priya (★ 4.8, 12 trips, Tier 3)

3/8 spots remaining

[\[Join Meetup\]](#) [\[View Host Profile\]](#)

 Vlog Submission

@wanderlust_squad submitted a vlog for

"The Mandovi Mist" quest

 [0:45 vlog thumbnail – sunrise over river]

 67  12 ★ 4.9

Content Types

Type	Description	Verification
Quest Completion	Photo/video proving quest was completed	AI + peer review
Vlog	30s–3min video documenting an experience	Community rating
Trip Story	Multi-photo narrative of a day/trip	Self-published
Meetup Recap	Host/attendee summary of an event	Mutual ratings
Tip	Quick text tip about a city/spot	Community vote
Review	Review of a vendor/experience from the data engine	Verified purchase/visit

9. Meetups & Events System

Types of Events

EVENT TYPES

COMMUNITY MEETUP (user-hosted)

- Bonfires, group dinners, treks, city walks
- Hosted by Tier 3+ users
- Max 20 attendees
- Free or split-cost

VELOSTA EVENT (company-hosted)

- Exclusive parties in partner venues
- Invite-only (badge requirements)
- Quarterly in major cities
- Premium experiences (rooftop dinners, yacht trips)

QUEST RALLIES (timed group competitions)

- Teams race to complete quest chains
- City-wide, weekend-long events
- Prizes for top teams
- Creates viral, shareable content

GROUP ACTIVITIES (activity-based)

- "Anyone want to do the sunrise trek tomorrow?"
- Spontaneous, lightweight, 2-6 people
- Match by quest interest + time availability

Event Data Model

```
interface Event {
  id: string;
  type: 'community_meetup' | 'velosta_event' | 'quest_rally' | 'group_activity';

  // Host
  hostId: string;
  hostTier: TrustTier;

  // Details
  title: string;
  description: string;
  location: {
    lat: number;
    lng: number;
    name: string;
    address: string;
  };
  datetime: Date;
  duration: number; // minutes

  // Capacity
  maxAttendees: number;
  currentAttendees: string[]; // user IDs
  waitlist: string[];

  // Requirements
  minTrustTier: TrustTier;
  requiredBadges?: string[]; // for exclusive events
  costPerPerson?: number; // 0 for free events
  costSplit: 'free' | 'split' | 'host_covers' | 'custom';

  // Safety
  checkInCode: string; // QR code for in-person verification
  emergencyContact: string;

  // Post-event
  ratings: EventRating[];
  photos: string[];
  recap?: string;
}
```

10. Trip Memory Engine — The Grand Finale

The Problem with Current Trip Memories

After a trip:

- Photos rot in camera rolls (3,000 photos, 2,990 will never be seen again)
- Videos are too long to edit, too short to share
- The story of the trip is lost — you remember *what* you did but not *how it felt*
- There's no single artifact that captures the *entire journey*

Velosta's Trip Memory Engine

At the end of every trip, Velosta automatically compiles everything the user generated during their quests, meetups, and explorations into a **polished, shareable, preservable trip artifact**:

YOUR GOA STORY

 March 12–16, 2026 • Friends Trip • Silver Tier

CINEMATIC RECAP VIDEO

AI-edited 60s highlight reel from your
quest vlogs, photos, and route data

▶ [\[Play\]](#)  [\[Download\]](#)  [\[Share\]](#)

PHOTO BOOK

Auto-curated best photos from each quest
Arranged chronologically with quest captions
Print-ready layout (order physical copy)

 [\[View Book\]](#)  [\[Order Print\]](#)

JOURNEY MAP

Interactive 3D map showing your exact route,
every quest location, and timestamp
Replay your trip as an animated flyover

 [\[View Map\]](#)  [\[Share\]](#)

TRIP STATS

Quests Completed: 9/12 (Silver)
XP Earned: 1,850
Distance Covered: 127 km
Cities Explored: 3 (North Goa, South Goa, Old)

People Met:14 (3 at bonfire meetup)

Badges Earned:

Best Moment:"The Mandovi Mist" (★ 4.9)

 SOCIAL CARDS

Pre-designed, directly-postable Instagram/WhatsApp stories from your trip highlights

[Card 1] [Card 2] [Card 3] [Card 4]

 [Download All]

Memory Generation Pipeline

User's Trip Data		AI Processing		Output Artifacts
- Quest photos/vlogs - GPS route history - Quest completions - Meetup photos - Badge/XP earned - Timestamps	→	- Best-shot selection - Chronological ordering - Caption generation - Music matching - Social card design - Narrative writing	→	60s recap video - Photo book layout - Journey map (3D) - Trip statistics - Social media cards - Shareable link

11. User Profiles & Traveler Identity

Profile Structure

[illegible]

Leaderboards

Leaderboard	Scope	Purpose
City Leaderboard	Per city	Who's conquered this city the most
Weekly Active	Global	Most XP earned this week
All-Time	Global	Total XP across all trips
Quest Category	Per category	Best food explorer, best sunset chaser, etc.
Friends	Social circle	Compare with your friend group
Event Hosts	Global	Most-loved event organizers

12. Content Moderation & Safety

Moderation Pipeline

Content Guidelines

- **No fake completions** — AI verifies photo/video matches quest requirements
- **No hate speech, harassment, or discriminatory content**
- **No commercial spam** — quest completions aren't ads
- **No location spoiling** — don't post exact GPS of hidden gems publicly (only to verified users)
- **Respect local culture** — no disrespectful content at religious/cultural sites
- **Privacy-first** — no photos of strangers without consent

13. Data Flow — How Community Feeds the Engine

This is the **flywheel** that makes Velosta unstoppable:

Community Data as Training Data

Every verified quest completion, vlog, and review feeds back into the data engine with the **highest confidence score possible** — because it's first-party, verified, source-linked, and timestamped. This means:

1. **AI itineraries get better over time** — they're trained on *real* Velosta user experiences

- 2. **Quest quality improves** — quests that get poor ratings are retired; ones that get great vlogs are promoted
- 3. **Hidden gems stay current** — a café that closed last month gets flagged by the next user
- 4. **Seasonal accuracy** — the engine learns that "Mandovi Mist" quest only works in winter

14. UI/UX Design System — Velosta DNA

Design Continuity with Existing App

The community **MUST** feel like a natural extension of the Velosta travel planner. Same DNA, same soul.

Design Tokens (from existing Velosta)

Token	Value	Usage
--ivory	#F6F3EE	Page backgrounds
--sandstone	#D8C7B3	Secondary surfaces, borders, dividers
--warm-beige	#E8DFD2	Cards, panels, quest board background
--terracotta	#C4734F	Primary accent — CTAs, active states, XP indicators
--soft-gold	#C9A96E	Badges, achievement highlights, premium elements
--deep-charcoal	#2C2C2C	Text, contrast elements
--deep-navy	#2C3E50	Headers, strong contrast

Community-Specific Additions

Token	Value	Usage
--quest-active	#C4734F	Active/available quests
--quest-complete	#4A9B6E	Completed quests (muted forest green)
--quest-locked	#9B9B9B	Locked quests
--xp-glow	rgba(201, 169, 110, 0.4)	XP earned animations

Token	Value	Usage
--trust-verified	#4A9B6E	Verified user indicators
--event-live	#E85D3A	Live/happening-now events

Glassmorphism Continuity

```
/* Quest cards use the same glass-panel system */
.quest-card {
  background: rgba(253, 252, 250, 0.72);
  backdrop-filter: blur(40px) saturate(1.8);
  border: 1px solid rgba(216, 199, 179, 0.22);
  border-radius: 20px;
  box-shadow: inset 0 1px 0 0 rgba(255, 255, 255, 0.6);
}

/* Badge glow effect */
.badge-earned {
  box-shadow: 0 0 20px rgba(201, 169, 110, 0.4);
  animation: badge-pulse 2s ease-in-out infinite;
}
```

Typography

Element	Font	Weight	Size
Section headers	DM Serif Display	Bold	28–36px
Quest titles	DM Serif Display	Medium	18–22px
Body text	Outfit / Inter	Regular	14–16px
XP/Stats	Outfit	SemiBold	12–14px
Badges	Outfit	Bold, uppercase	10–12px, tracking 0.3em

Animation Principles

Animation	Timing	Easing
Quest completion	600ms	ease-out-expo (0.16, 1, 0.3, 1)

Animation	Timing	Easing
Badge unlock	800ms with bounce	ease-spring (0.34, 1.56, 0.64, 1)
XP counter tick-up	1200ms	ease-in-out
Card entrance	300ms staggered	ease-out
Level-up celebration	1500ms with particles	custom spring

Key UI Screens

1. **Community Home / Feed** — Filtered activity feed (quest completions, meetups, vlogs)
2. **Quest Board** — City-specific quest grid with categories, progress, and rewards
3. **Quest Detail** — Individual quest page with description, hints, past submissions, and submit button
4. **Profile** — Travel passport with stats, badges, trip history, map, and vlogs
5. **Leaderboard** — City, global, and friend rankings
6. **Events/Meetups** — Browse, join, host, and manage events
7. **Trip Memory** — Post-trip recap with video, photo book, stats, and social cards
8. **Notifications** — Quest unlocks, event invites, badge earned, nearby travelers

15. Technical Architecture

Tech Stack

Layer	Technology	Reason
Frontend	Next.js 14 (App Router) + TypeScript	Consistency with existing Velosta app
Styling	Tailwind CSS + custom design tokens	Matches existing design system
State	Zustand	Already used in trip planner
Maps	Mapbox GL JS	Already integrated for trip planner
Animations	Framer Motion	Cinematic feel, already in the stack
Auth	Firebase Auth + custom ID verification	Social login + government ID layer
Database	PostgreSQL + PostGIS	Geospatial queries for nearby events/users
Media Storage	Cloudflare R2 or AWS S3	Cost-effective for vlogs/photos
Cache	Redis	Real-time leaderboards, live event data
AI	OpenAI GPT-4 / Claude	Quest generation, content moderation, memory compilation
Push Notifications	FCM (Android) + APNs (iOS)	Event reminders, quest unlocks

Layer	Technology	Reason
Real-time	WebSocket (Socket.io or Supabase Realtime)	Live feed updates, event chat

16. Database Schema

Core Tables

-- Users & Identity

```
CREATE TABLE users (  
  id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  username VARCHAR(50) UNIQUE NOT NULL,  
  display_name VARCHAR(100) NOT NULL,  
  email VARCHAR(255) UNIQUE NOT NULL,  
  phone VARCHAR(20),  
  avatar_url TEXT,  
  bio TEXT,  
  home_city VARCHAR(100),  
  trust_tier INTEGER DEFAULT 1,          -- 1=basic, 2=verified, 3=trusted, 4=ambassador

17. API Specification

Authentication

Endpoint	Method	Description
POST /api/auth/register	POST	Create account (email + phone)
POST /api/auth/verify-id	POST	Upload government ID for verification
POST /api/auth/liveness-check	POST	Selfie verification
GET /api/auth/profile	GET	Get current user's profile

Quests

Endpoint	Method	Description
GET /api/quests/:cityId	GET	Get all quests for a city

Endpoint	Method	Description
GET /api/quests/:cityId/board	GET	Get personalized quest board (progress, unlocks)
GET /api/quests/:questId	GET	Get single quest detail with past submissions
POST /api/quests/:questId/complete	POST	Submit quest completion (media + caption)
GET /api/quests/:questId/submissions	GET	Browse quest submissions

Profile & Achievements

Endpoint	Method	Description
GET /api/profile/:userId	GET	Get user profile with stats, badges, trips
GET /api/profile/:userId/trips	GET	Get trip history
GET /api/profile/:userId/badges	GET	Get earned badges
GET /api/leaderboard	GET	Global leaderboard
GET /api/leaderboard/:cityId	GET	City-specific leaderboard

Events

Endpoint	Method	Description
GET /api/events/:cityId	GET	Browse events in a city
POST /api/events	POST	Create a new event (Tier 3+ only)
POST /api/events/:eventId/join	POST	Join an event
POST /api/events/:eventId/checkin	POST	Check in with QR code
POST /api/events/:eventId/rate	POST	Post-event rating

Feed

Endpoint	Method	Description
GET /api/feed/:cityId	GET	City-specific feed
GET /api/feed/global	GET	Global trending feed
POST /api/posts	POST	Create a post
POST /api/posts/:postId/like	POST	Like a post
POST /api/posts/:postId/comment	POST	Comment on a post

Trip Memory

Endpoint	Method	Description
POST /api/trips/:tripId/compile	POST	Trigger memory compilation
GET /api/trips/:tripId/memory	GET	Get compiled trip memory artifacts
GET /api/trips/:tripId/social-cards	GET	Get generated social media cards

18. Development Phases & Roadmap

Phase 1 — Foundation (Weeks 1–4)

- Goal:** Auth, profiles, and the quest system shell
- ☐ Set up Next.js community module within Velosta project
 - ☐ Firebase Auth integration (email + Google + Apple sign-in)
 - ☐ User profile page (stats, badges placeholder, trip history placeholder)
 - ☐ Database schema (PostgreSQL) for users, quests, completions
 - ☐ Quest board UI — city selection → quest grid → quest detail
 - ☐ Quest completion flow — upload photo/video → submission review
 - ☐ Basic XP system — earn XP on quest completion, level up
 - ☐ Design system extension — community tokens, quest card components

Phase 2 — Gamification & Social (Weeks 5–8)

Goal: Badges, leaderboards, and the social feed

- ☐ Badge system — define initial badge set, track progress, unlock notifications
- ☐ Leaderboard — global, per-city, per-category, weekly
- ☐ Social feed — quest completions, vlogs, tips
- ☐ Like + comment system
- ☐ Content moderation pipeline (AI auto-review + community flagging)
- ☐ Push notifications — quest unlocks, badge earned, nearby events

Phase 3 — Events & Meetups (Weeks 9–12)

Goal: Real-world meetup system

- ☐ Event creation flow (Tier 3+ users)
- ☐ Event discovery — browse by city, type, date
- ☐ Event join + waitlist system
- ☐ QR check-in at events
- ☐ Post-event rating system
- ☐ Velosta-hosted event management (admin panel)
- ☐ Group activity matching (spontaneous "anyone want to..." flow)

Phase 4 — Trust & Safety (Weeks 13–16)

Goal: ID verification and safety features

- ☐ Government ID upload + AI verification
- ☐ Liveness check (selfie verification)
- ☐ Trust tier progression system
- ☐ Report system — categories, review queue, actions
- ☐ Emergency SOS feature
- ☐ Block/mute functionality
- ☐ Admin moderation dashboard

Phase 5 — Trip Memory Engine (Weeks 17–20)

Goal: Post-trip memory artifacts

- ☐ Trip tracking — automatic or manual trip start/end

- ☐ GPS route recording (opt-in)
- ☐ AI memory compilation — best photo selection, chronological ordering
- ☐ Cinematic recap video generation (AI-edited from user vlogs)
- ☐ Photo book layout generation
- ☐ 3D journey map (Mapbox animated flyover)
- ☐ Social media card generation
- ☐ Trip stats dashboard
- ☐ Shareable trip story link

Phase 6 — Quest Intelligence (Weeks 21–24)

Goal: AI-powered quest generation and adaptation

- ☐ Quest generation pipeline from data engine corpus
- ☐ Ambassador quest review/curation interface
- ☐ Dynamic quest adaptation (weather, time, crowd, group size)
- ☐ Quest chain system (multi-quest narratives)
- ☐ Seasonal quest variations
- ☐ Community quest suggestions
- ☐ Quest quality metrics and retirement system

Phase 7 — Scale & Polish (Weeks 25–28)

Goal: Performance, mobile experience, and viral features

- ☐ PWA support with offline quest access
- ☐ Performance optimization (lazy loading, CDN, caching)
- ☐ Mobile-first responsive polish
- ☐ Referral system (invite friends → bonus XP)
- ☐ Quest Rally system (team competitions)
- ☐ Partner vendor integration (discounts for quest completers)
- ☐ Analytics dashboard for growth metrics

19. Success Metrics

User Engagement (30 days post-launch)

Metric	Target
Weekly Active Users (WAU)	5,000+
Average quests completed per trip	6+
Quest completion rate (started → completed)	60%+
Event attendance rate (registered → checked in)	70%+
Profile completion rate	80%+
Content submissions per trip	8+ (photos/vlogs)

Growth (90 days)

Metric	Target
Verified users (Tier 2+)	10,000+
Cities with active quest boards	25+
Community-hosted events	100+
Trip memories generated	2,000+
User-generated content pieces	50,000+

Quality

Metric	Target
Average quest rating	4.3+/5
Average event host rating	4.5+/5
Content moderation false positive rate	<5%
User retention (30-day)	40%+

Metric	Target
NPS Score	50+

20. Competitive Differentiation

Competitor	What They Do	Why Velosta Wins
TripAdvisor	Reviews + booking	No gamification, no community, no quest system, anonymous reviews
Strava	Fitness gamification	Running-only, no travel quests, no meetup system
Couchsurfing	Traveler meetups	Safety concerns, no gamification, no trip planning
Wanderlog	Trip planning	No community, no quests, no social layer
Polarsteps	Trip tracking	Passive tracking only — no quests, no achievements, no community
MakeMyTrip	Booking platform	Zero experiential focus — it's a shopping cart, not an adventure

Velosta's Unique Moat

1. **Data Engine** — No one else has a scraping engine that builds a god-level corpus of real experiences per city
2. **Quest Intelligence** — AI-generated quests from verified data, not generic sightseeing lists
3. **Verified Community** — ID-verified users make meetups safe, reviews trustworthy
4. **Flywheel Effect** — Community content feeds the data engine feeds the quest library feeds community engagement
5. **Trip Memory** — No app turns your trip into a polished, shareable story automatically
6. **Full Stack** — Plan → Experience → Remember → Share — all in one app

Appendix A — Quest Examples

Goa — "The Fisherman's Feast" (Easy, Taste)

Description: The best prawn curry in Palolem isn't on Google Maps. It's in a shack behind the Church of the Holy Cross, run by a fisherman who only cooks what he caught that morning. No sign. No reviews. Just follow the smell of kokum and coconut.

Hint: "Walk past the church. Turn at the banyan tree. Listen for the radio."

Verification: Upload a photo of the dish with the stall visible in the background.

XP: 150 | **Duration:** 45 min | **Intensity:** Chill

Manali — "The Forgotten Temple" (Hard, Hidden)

Description: Above Old Manali, past the last guesthouse, there's a trail that locals use to reach a 400-year-old wooden temple. No tourist has written about it. The carvings depict a story that the village elder will tell you — if you ask in Hindi.

Hint: "The trail begins where the concrete ends."

Verification: Upload a 30s video of the temple carvings.

XP: 500 | **Duration:** 3 hours | **Intensity:** Intense

Jaipur — "The Blue Hour" (Medium, Golden Hour)

Description: Everyone photographs Hawa Mahal at golden hour. But the real magic is at 5:50 AM, when the first light hits the pink sandstone and the street below is completely empty — no cars, no tourists, just pigeons and chai vendors setting up.

Hint: "Be there before the first autorickshaw."

Verification: Upload a photo showing the empty street with morning light on the façade.

XP: 250 | **Duration:** 30 min | **Intensity:** Chill
